

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (Previously Presented): A composition comprising an oligosaccharide blend that comprises fructo-oligosaccharide (FOS) and galacto-oligosaccharide (GOS), wherein (a) the composition comprises from about 15 g to about 20 g of the oligosaccharide blend; (b) each of said oligofructose and oligogalactose are composed of chains with a degree of polymerization ranging from about 2 to about 7; (c) the weight ratio of FOS and GOS is from about 0.5 to about 20; and (d) the FOS and GOS are capable of synergistically promoting the growth of *Lactobacilli*, such that their combined prebiotic property is greater than the sum of their individual prebiotic properties.

Claim 2-5 (Canceled):

Claim 6 (Previously Presented): The composition according to claim 1, wherein said composition provides at least 400 kcal per serving.

Claim 7 (Previously Presented): The composition according to claim 1, wherein the composition comprises more than about 1en % protein, based on the total caloric content of the composition.

Claim 8 (Previously Presented): The composition according to claim 1, wherein the composition is nutritionally complete.

Claim 9 (Canceled):

Claim 10 (Previously Presented): The composition according to claim 1, wherein the composition comprises, per 100 ml: about 9 g proteins, about 22 g carbohydrates and about 9 g fats.

Claim 11 (Previously Presented): The composition according to claim 1, wherein the composition is a ready-for-consumption composition.

Claims 12-25 (Canceled):

Claim 26 (Previously Presented): The composition according to claim 1, wherein the composition further comprises glutamine.

Claim 27 (Currently Amended): A composition comprising glutamine and an oligosaccharide blend that consists essentially of fructo-oligosaccharide (FOS) and galacto-oligosaccharide (GOS), wherein each of said FOS and GOS contains up to 95% by weight of said oligofructose and said oligogalactose that are composed of chains with a degree of polymerization ranging from about 2 to about 7 and wherein the weight ratio of FOS and GOS is from about 0.5 to about 20 and wherein the FOS and GOS are capable of synergistically promoting the growth of *Lactobacilli*, such that their combined prebiotic property is greater than the sum of their individual prebiotic properties.
